Atty's Signature

AARON C. DEDITION

**AMENDMENT**

SIR:

In response to the Office Action mailed on August 28, 2002, please reconsider  
the above-identified application based on the following:

**IN THE CLAIMS:**

11. (Amended) An interferometric measuring device for detecting one of a shape and a  
distance of a rough surface, the measuring device comprising:

at least one spatially coherent beam gun unit for emitting a short time coherent  
broad-band beam;

a first beam splitter for splitting the short time coherent broad band beam into  
a first partial beam and a second partial beam;

a first device for one of modulating a phase of the first partial beam with  
respect to a phase of the second partial beam, and for shifting a frequency of the first partial  
beam with respect to a frequency of the second partial beam by a heterodyne frequency;

a time delay element arranged in a beam path of one of the first partial beam  
and the second partial beam, for producing a difference of optical wavelengths of the first and  
second partial beams, the difference being greater than a coherence length of the beam  
emitted by the at least one spatially coherent beam gun unit;
